LYON'S MAGNETIC POWDERS, Will destroy Garden Insects, Cockroaches, Bed-Bugs, Fleas, Ants, Moths, and all pests of the vermin kind. The importance of a reliable article of this kind is inestimable. In warm weather all nature teems with these annoying foes. This powder is the only article ever discovfrom the Horticultural Society of Paris, while amidst the ferns of Asia, observed that all insects lighting upon a certain kind of plant very soon dropped dead. This fact was made use of to guard their night camps from the intruders. Quantities of the plant was brought home by Mr. E. Lyon, and found a positive insect destroyer in every experiment. It is simply a powdered leaf, chemically prepared to resist the effect of age and climate. Medals and Letters Patent have been obtained from the governments of England, France, Germany and Russia, from the World's Fair, and numerous medical and horticultural colleges and societies numerous medical and horticultural colleges and societies.

Letter from the President of the United States. "EXECUTIVE MANSION, WASHINGTON, 31st Jan. 1854. "MR. EMANUEL LYON.—Dear Sir: I have the pleasure to inform you that the Commission, of the World's Fair, at London, have awarded you a Medal and Certificate for the great value of your Magnetic Powders, &c.

Mr. E. Lyon.—Dear Sir: We have analysed and tested

Every gardner and housekeeper must have a direct interest in an article of this kind. Reference can be made to the Astor, St. Nicholas, and Metropolitan Hotels; to Judge Meigs, President of the American Institute; James Gordon Bennett, Gen. Winfield Scott, Cyrus W. Field, L. M. Pease, of the Five Points Mission. &c., &c. Judge Meigs says, "This discovery of Prof. Lyon is of national importance. The Farmers' Club have tested it thoroughly. It will destroy locusts, grasshoppers, ants, moths, bugs, and all vermin. Garden plants can be preserved, and houses made pure." Arrangements are now made through Messrs. BARNES & PARK, of New York, to have it sold throughout the world.

Many worthless imitations are advertised. Be cautious!
"New York, Nov. 8th, 1858. "In retiring from business, I have sold all my Insect Pow ders and Pills, Letters Paptent, and the secrets pertaining thereto, to Messrs. Barnes & Park. The Powder is a discovery made by myself, and brought from the interior of Asia, and is unknown to any other persons. The genuine and effective article is put up in tin canisters, and will continue to bear my name. "E. LYON."

THE POPULARITY OF THE MEXICAN MUSTANG LINIMENT, is coextensive with the civilization of the globe. Other articles claim to alleviate pain and distress this cures. Family Physicians, Government Hospitals, Planters, Farmers, Livery men, &c., have practically demonstrated this fact, throughout the world. No article ever before received such undivided praise and support from Medical

RHEUMATISM of years' standing, has been totally cured. Piles, Ulcers, Tumors, Running Sores, Scrofula, Stiff Joints, Felons, Swellings, Burns, Bites, Boils, Chaps, Neuralgia, Salt Rheum, and all aches and pains upon man, and kindred complaints upon HORSES, CATTLE, &C.

420 BROAD STREET, PHILADELPHIA, PA. (Extract.) "In lifting the kettle from the fire it became unmanageable, tilted over, and scalded my hands very severely, almost to a crisp. It was an awful sight. The Mustang Liniment appeared to extract the pain. It healed rapidly, without soreness, and left no scar of account.

Truly yours, "CHARLES FOSTER."

Such language as this is but the constant and natural echo wherever this article is used.

This Liniment is indispensable to planters and owners of horses and mules. Mr. John Daniels, Montgomery, Ala., sold a slave for \$800, who was raised from utter uselessness by this Liniment. Every family should have it. Be very particular and enquire for the Mustang Liniment and take no other. wherever this article is used.

If they say I am wrong or I am right—I shall always go for the weaker dog,
For the under dog in the fight. I know that the world, that the great, big world

Will never a moment stop

it ought not, for this reason, to be received with less satisfaction; because there is nothing more important Vie than the triumph of the pacific means so opportunely employed, or more to the credit of the civilization of the age in which we live.

The following communication from Gen. Urquiza addressed to the government of the Argentine Contederation, dated the 5th of February, gives a complete account of the event to which we refer:

TO THE MOST EXCELLENT NATIONAL GOVERNMENT: On returning from Asuncion, I proceed to fulfil my duty in giving the most excellent national government an account of the fulfilment and result of the mission with which I was intrusted, and concerning which your excellency thought proper to authorize me in consequence of the note which I directed to you under date of the 10th

I dedicated my best efforts from the earliest moment o remove from the mind of President Lopez the apprehension and alarm produced by intentional reports and sinister declamations on the part of a certain portion of the press. The government of Paraguay was decidedly resolved to make a heroic resistance; a considerable concentration of military and warlike elements had been prepared to defend to the very utmost degree the dignity of the country. The immense power of the American Union would en

ounter the force of a people and a government proud of their national powers. I may be permitted to express to your excellency that the aspect of that war profoundly affected my heart; I trembled for the destiny of the innocent people; I tremble for the future of these effected my heart; I trembled for the destiny in political life and in the progress new born countries

It was also the case that the most expressive demonstrations of friendship for the imperial government, and that his presence was hailed as the precursor of a happy conclusion.

Spain having but little intercourse with her colonies, the United States derived large profits from the carrying trade with all the West Indies and South America. Neither have we any news of the terms of the arrange ment made because the private documents to which Gen.

From the U. S. Eco

The war question in Enrope is apt to be regarded as having no very direct material influence upon the interests of the United States, but the fact, on investigation, may appear to be quite otherwise, since the state of affairs in Western Europe has changed materially in the forty-four years that has elapsed since the peace of 1815. In that period the consumption of food and of articles of necessity have become much greater throughout the continent. Those who had been engaged in war became artisans, and the general well being so increased, that not only has more food been demanded, but the ability to pay for it has increased. It has resulted that those countries, France and England in particular, which had been exporters of food became importers, so much so, that a good harvest only lessens the demand for foreign aid in that respect. The great improvements that have taken place in agriculture have only served to moderate the movement. It has resulted that the demand upon the most fertile agricultural section has become annually greaters and respective and the most fertile agricultural section has become annually greater and mutual intercourse more important. The fertile soil of Italy and Southern Germany has been more depended upon for grain, and Sardinia has found a large customer in France for her grain. The other states of Italy are also greatly improved in their commerce, not-withstanding the adverse influence of bad government.

The two last are Austrian Italy, and all form what threatens to be the theatre of war. That whole region of country has more or less contributed to the indispensable supplies of silk and grain which the growing wants of Europe require. Italy has been ravaged in modern times more than any other country by hostile armies, but its inexhaustible fertility has always restored its prosperity. The last forty years, more particularly, has enabled it to develop its material resources. Sardinia in particular, has exported, among other articles, as fol-lows, according to the last annual returns:

The whole value of Sardinian exports is composed of agric iltural products, as is also that of the other states of Italy. The failure of the silk crops within the last two or three years has been the cause of a great rise in the value of the article, and of the large amount of silver

under the management of that gentlemanly and efficient conductor, Captain Scott, a few days since stopped at one of the way stations to take on a couple newly married. Both were young and both were verdant, having been raised in the wilds of Western Virginia, neither of them had ever been fifty miles away from home. They had beard of locomotives steamboots and batche. them had ever been fifty miles away from home. They had heard of locomotives, steamboats and hotels, but had never experienced the comforts of any of the aforenentioned institutions. Jeems and Lize had determined on this, the most important event in their lives, to visit the city and see the world, particularly that part that is known as Parkersburg. No wonder that they were amazed and delighted when the locomotive, steaming and amazed and delighted when the locomotive, steaming and snorting, with the train of beautiful crimson cars follow-

ing it, came in sight.

"These your trunks?" said the baggage master.

"Well, I sorter calkilates them's 'em," said Jeems. The trunks (a spotted hair trunk and a very old fashioned valise,) were soon in the baggage car, followed by Lize and Jeems.

"Ill be darned ef railroad aint a fine thing," Jeems seating himself on his luggage and carefully holding up the tails of his fight-bodied blue, adorned with endent metal buttons, out of the dust. "Lize, set here by me."

Here the captain interposed and explained matters, insomuch that Jeems consented to leave his traps and follow the captain. What was his delight when he surveyed the magnificence of the first class passenger car, into which he was ushered. His imagination had never in its wildest flights pictured anything half so gorgeous. He was aroused from the contemplation of the splendor

THE HUGUENOTS OF AMERICA.-In 1690. William THE HUGUENOTS OF AMERICA.—In 1690, William the Third sent a body of Huguenots, who had followed him from Holland to England, to the Province of Virginia. They made a settlement on James River above Richmond, called the "Manakin Town," after an Indian tribe. In 1699 it was increased by three hundred families, and the next year one hundred more arrived from Canada. Philip de Richbourg was for a long time their spiritual counsellor, and afterward conducted part of his flock to the banks of the Trent in North Carolina. Thence they were compelled by the Indiana Carolina. Thence they were compelled by the Indians to fly, and emigrated to South Carolina, which became their permanent abode. As early as 1666, the Legislatures of both Maryland and Virginia granted naturalization to the French Protestant emigrants of these provinces. In 1697 the same political privileges was extended to these refugees in the two Carolinas, and in 1793 to the New York immigrants.

South Carolina was styled the "Home of the Hugue-

nots," from becoming their principal retreat in the new world. One thousand embarked for "La Carolina" from the ports of Holland alone. The expeditions left Rotterdam, touching in England on the voyage to America: Isaac Masicg came over in one of them. He had long been a merchant in Rhe; and settling in Charleston amassed a large fortune, which he used for his adopted country. In 1687, the Lord Commissioners of James the Second, by the royal bounty, sent six hundred English and French emigrants to Carolina. Jean Pierre Pury, of Neufchatel, emigrated to Caro.

lina in the year 1723, with 375 Protestant families from Switzerland. To this company the British government liberally granted 40,000 acres of land, with £4 sterling to each adult. The settlements were again strengthened during 1764 by the accession of 212 more voluntary exiles. Their pastor, named Pilbert, accompanied them from France; and they named their settlement New Bordeaux, in remembrance of the capital of Guyenne, their former home. In 1782, there were not less than 16.000 Protestants in South Carolina, and most of them French. One writer says: "They live like a tribe, like one family. Each one makes it a rule to assist his compatriot in his need, and to watch over his fortune and

his reputation with the same care as his own." In our glorious struggle for liberty, the French refurees zealously aided the cause of freedom. South Carolina was the first to adopt an Independent Constitution upon the news of the battle of Lexington; and Henry Laurens was the President of the Convention which took the important step. Among her militia and regular troops were many illustrious descendants of the Huguenots, as Francis Marion, Peter Bosquet, Samuel

Legare and Henry Peronneau. It is a striking fact, that three of the seven Presidents who guided the deliberation of the Continental Congress were descendants of the French Protestants-Henry Laurens, John Jay and Elias Boud not. Two of them, Boudinot and Jay, were also presiding officers of the American Bible Society.—Knickerbocker Magazine.

Madam-The President has charged me, in presenting my credentials as Envoy Extraordinary and Minister Plenipotentiary of the United States in Spain, to renew to your Majesty the assurance of the desire which animates him to preserve the friendship to your govern-ment, and of the wishes he entertains for the prosperity of your people.

In commencing my official relations with the Court of Madrid, I am confident that I shall be permitted to assure your majesty that I am personally convinced that the general desire of the population of the United States is to retain the old and never interrupted friendship always prevailed with Spain; and that during my stay at the Court of your Majesty-continuing the frank and sincere conduct which has hitherto been followed-it will be my constant effort to avoid any misunderstanding, and to promote the interests of my country without prejudice to the amicable relations which happily now

The Queen replied-Sir-I have been highly satisfied at hearing the sentiments of friendship which, in the name of the President of the United States, you have just expressed. I do not feel a less strong desire than you do to continue the friendly relations which happily unite the two States. We believe, as you say, that this same desire is that of the generality of the population of the United States, and by observing the line of conduct you intend to follow, I have the confidence that it will be easy for you to contribute to preserve the friendship and good har

mony which ought to exist between the two peoples. I take pleasure in believing that your personal qualities will facilitate the realization of this noble object, and my government on its part will sincerely co-operate

in maintaining that object. Before giving audience to Mr. Preston, her Majesty received Mr. Dodge, the retiring United States Minister; he also said that the President had charged him to cultivate friendly relations with Spain, and he took credit to himself for having done so. Editor of " South Countryman :" DEAR SIR: In order to test the value of lime, as a fertilizer, when applied to cotton, I selected from a stubble-field of fifteen acres-five acres decidedly inferior in quality to the balance—and during the second week n February last, without previous breaking, laid off the rows with long, straight shovels, three feet apart, returning in the same furrow so as to make deep trenches. l'hese were filled with wheat straw partially decomposed; unslacked lime was deposited in small heaps at the end of the rows, at convenient distances apart, for distribution, and seventeen bushels applied to the acre, regularly and evenly distributed over the straw.-The ground was immediately bedded out in full. A few days before planting, two sweep furrows were run be-tween each row, and fresh dirt thrown over the entire row. The seed was sown between the 10th and 15th of "As they used to say in our debatin' society," interrupted Jeems, "I'll amend the motion by sayin' you can tell'em to give us the best there're not I'm and 15th of ed with a harrow. I am satisfied, from previous experience in the cultivation of the same ground, that without the application of the lime, the yield would not have exceeded six hundred pounds per acre. And in addition to the increased yield of the past

crop, I anticipate equally good results from the coming The lime was applied at so late a period that the straw was not fully converted to manure, and in consequence the past crop failed to receive the full benefit of it. The great desideratum of planters in this section is to secure some agent that will push forward the young cotton plant rapidly in the spring, and, as a consequence, to early maturity. Our cotton-growing seasons are too short for the full development of the plant, except in extraordinary years like the past; hence the necessity of leak was. It seemed stronger in the neighborhood of the room occupied by the bride and groom. The clerk defect in the climate, by pushing the cotton to early management.

I am fully convinced, from the small and imperfectly conducted experiment by me, that lime will supply this desideratum. Its cheapness and facilities of transportation, place it in the power of farmers of limited means to improve their lands and thereby increase their crops;

A LAWYER STUMPED.—From Tennessee a legal genleman writes as follows:

of the Eastern Circuits our Judge was well

e law, upright, and liked a joke. An im-Il case, involving some fifteen thousand dolefore the court for trial. Able counsel were oreak the will, on the ground that undue coersed by the testator's wife over him, he by his vs | Heyer & VonGlahn, Original Attachment. will manamitting several slaves, as the heirs held against

his Gwn wish. All went on smoothly for a time, when Sam Roberts, torney for the plaintiffs, asked witness if he had heard the deceased say anything about making a will?

Well, what did you hear, Mr. Jackson?" "I heard him say he wanted to see his negroes free,

"You may stand aside," hastily interrupted Sam. "The witness stood bewildered; the bar was convuled with laughter; witness glanced up and down uneasily, till at length his Honor summoned enough of gravity to tell the witness that his evidence was not as Mr.

again. He was attempting to show by a witness that the deceased did not want to make a will. Mr. Wilson," said Sam, "did you ever hear Hor-

ton say anything about a will?" Yes, sir.

Roberts wanted, and that he might stand aside.

Well, what was it, Mr. Wilson?" He said he did not want to make a will." Did he give any reasons?"

Yes, sir. Well, what were they? Give us his own words." Well, I will. He said he did not want that rascal

of a lawyer, Roberts, coming over there with a bale of sacks to take away his money! Poor Sam was dumbfounded; the bar fairly roared

when the Judge, either from a spirit of fun, or because he did not hear, requested the witness to repeat. The merriment became general. It is needless to add that the will was sustained.

THE MILITARY CONDITION OF FRANCE-France, it said, is now in a position to transport by sea 50,000 men, without using a single sail-ship towed by a steamand as soon as the line of steamships to the United tates and South America are fairly in operation, she will possess steam ships enough to transport in almost any direction, a very powerful army. A Paris letter writer alluding to these facts, makes this statement:

" France has sailors enough for this purpose, as France has twice as many sailors as her navy in its present state equires, and if England were the object of the expediion, the same fleet could carry a great deal larger army n one of 50,000 men. The mere rumor that an army invasion of 50,000 men was on its way borne by am, would carry terror into the heart of the people nvaded. Every day and in every direction the latter would be expecting to see this terrible fleet, and this anxiety would be a source of serious injury to the enemy. If the littoral population be loyal and patriotic, they will be paralyzed by painful anxiety; if they be discontented and disaffected they will await the arrival

of the French army as a signal for their deliverance." The author of the foregoing is said to be the Prince de Joinville, who has more than once thought seriously of an invasion of England.

Capt. Travis, who is said to be the best pistol shot in the world, sent a ball, last week, (says a Wash ington paper,) through a box of the diameter of half a dollar, held between the thumb and finger of his servant, at the distance of fourteen paces; he also struck in the centre a half dime held between his own feet.

DIED.

departed this life in Wayne county, on the 22nd of March, in 61st year of her age. The translation of our beloved friend to the church triumphant has left a vacancy in the church on earth not easily filled. By nature she had a clear, well balanced mind, her position in society gave her cultivation of manners, and the grace of God crowned her whole charcter with a charm wich endeared her to a large circle of relatives and friends. Her early years were spent among the frivolities of fashionable life; her latter years were devoted to the offices and duties of religion with remarkable conscientiousness and zeal. She was one of the best women I ever knew. Her example was a blessing to ministers and laymen. She seemed never to forget that she was the Lord's. She had the happy art of maintaining a piety, at once most positive and unobstrusive. A very few minutes in her company, would make any stranger feel that she was a christian and yet, while her conversation-in the sense of her whole existence—seemed informed with the elements of devotion, lungs he shouted "Wet the ropes!" The vigilent police self-denial, and earnestness, it was the most inoffensive life nced on the culprit and lodged him in prison; the one can well imagine. She was so lovely and so good; so the times, in which I have been still in my chamber, over it removed, or troubled with scrofula, scald-head, or other tion in force, and the cheers of the people proclaimed the success of the great undertaking. Next day the British which no word could be heard, in the silent night watches, riminal was solemnly arraigned before his Holiness; which no word could be heard, in the shelt hight watches, when she supposed all were asleep, and when she was pleading with God. May her prayers, even now, be answered!

She was ill about a fortnight. Shortly before she became unable to converse I reached her residence. She folded me alarmed. The Lord does all things well, and I submit to his will. If this be dying, it is easy. God is near, and many of my best friends are around me." This was the temper

of her dying. Those who knew her most intimately will feel how slight is this tribute to so good a disciple of our Lord. But her ecord is on high.
On Thursday, 23d, a funeral discourse was delivered at her late residence, and on the 24th, her remains were depos

ANN ARBOR, Nov. 5, 1856.

Prof. O. J. Wood—Dear Sir: I have heard much said

of the wonderful effects of your Hair Restorative, but having been so often cheated by quacks and quack nostrums, hair dyes, &c., I was disposed to place your Restorative in the same category with the thousand and one loudly trumpeted quack remedies, until I met you in Laurence county some months since, when you gave me such assurance as induced the trials from Postoretwin my family fair the property of the pro duced the trial of your Restorative in my famil, —first by my good wife, whose hair had become very thin and entirely white, and before exhausting one of your large bottles, her hair was restored nearly to its original beautiful brown color hair was restored nearly to its original beautiful brown color, and had thickened and become beautiful and glossy upon, and entirely over the head; she continues to use it, not simply be cause of its beautifying effects upon the hair, but because of its healthful influence upon the head and mind. Others of my family and friends are using your Restorative, with the happiest effects; therefore my skepticism and doubts in reference to its character is entirely removed; and I can and do most cordially and confidentially recommend its use by all who would have their hair restored from white or gray (by reason of sickness or age,) to original color and beauty, and by all young persons who would have their hair beauti-

ful and glossy.

Very truly and respectfully yours,

SOLOMON MANN.

FRIEND WOOD: It was a long time after I saw you at Blissfield before I got the bottle of Restorative for which you gave me an order upon your agent in Detroit, and when I got it we concluded to try it on Mrs. Mann's hair as the surest test of its power. It has done all that you assured me it would do; and others of my family and friends, having witnessed the effects, are now using and recommending its use to others as entitled to the highest consideration you claim for it

REVIEW OF THE WILMINGTON MARKET.

light during the past two or three weeks, owing to which fact we have but meagre transactions to report. The fol-

TURPENTINE-Nearly or quite all of last year's crop have ing been brought to market, the receipts for the next three or our weeks must necessarily be light, when the new crop have already been received and taken by distillers at \$5 .-The quantity received during the week just ended has been very small, not being sufficient for distilling purposes, and the market closes firm at an advance of 5 cents on last Thursday's prices. We quote sales as follows:

Bbls. New Virgin. Yel. Dip. Hard. Friday... 220 5 00 Saturday.... 585 Monday.... 42 3 05 Wednesday... 296 Thursday... 22 3 05 SPIRITS TURPENTINE-The market has ruled inactive since

our last, and the transactions have been limited at a decline of one cent # gallon. The receipts for the week have been exceedingly light, and only a small stock remains in first hands; buyers, however, seem but little disposed to operate. The following comprises all the sales we have heard

TAR-Has been in fair request for shipment during the past week, and the market has ruled firm. Only about 663 bbls. received and sold at \$1 75 % bbl.

Rosin -For the finer grades the market has been almost entirely neglected since our last-the transactions having been confined to the lower qualities. A few lots of new Pale have arrived, but owing to the high prices which holders have been asking, no sales of consequence have taken place. We quote nominally at \$5 to \$6 \$6 bbl. as extremes. In No. I we hear of only small sales inferior quality at \$1 37 a \$1 50 @ bbl. For low No. 2 there has been a moderate demand, and we note sales of 1583 bbls. at \$1 20, \$1 25 a \$1 371 Bbl., as in quality. In the Common article we notice considerable activity during the week, and the market has ruled firm at previous quotations. The quantity coming in is small, and the stock in first hands has become very much reduced; at the close sellers generally are firm in holding for highest figure. Sales for the week as follows:

Thursday, 119 bbls. at \$1 15 for large bbls. 1 25 for large bbls. 650 1 25 30 310 lbs. 1 25 % 310 lbs. 1 174 for large bbls.

BEEF CATTLE.—The receipts for some time past have er's hands. We note an active demand, and prime quality readily command high prices. One small drove was receiv-

ed in the early part of the week, and sold at 7½ cents \$2 lb.

for ordinary quality.

BARRELS.—The arrivals of Spirits Turpentine barrels have been meagre for several weeks past; there is, however, a fair stock in first bands, and in the absence of the usual demand the market has ruled decidedly dull. We quote sales of a few small parcels second hand once at \$1 60 a \$1 65 each, 60 and \$0 days; and \$1 85 a \$1 80 for selected.

COPPER.—There is a moderate stock of mearly all descriptions in store, and nothing doing except in the small way.—

See table for prices, as in quantity and quality.

COTTON.—After closing our review on Thursday last there is inquiry. Big Curching closed buoyant.

was some enquiry from buyers, and about 150 bales changed hands at 10j. 11j. 12j. 12j. a 12j cents per lb. for ordinary to good middling. Since then no public transac-tions have taken place that we are aware of; sellers holding at figures considerably above the views of buyers, and the market closes quiet. The arrivals continue small, and we note only a light stock offering on market. We quote nomnally at 111 to 121 cents for low to good middling.

CORN MEAL-Arrives sparingly, and is in moderate request ; market poorly supplied. We quote only small sales rom the granaries at 90 cents # bushel.

FLOUR-Since our last review the market has ruled tive under the advices received, and in the absence of the asual demand from retailers the sales have been confined to a few small lots of State brands at \$6 70 a \$6 75 30 bbl. for superfine. At the time of making up our report holders do not appear disposed to operate unless at a reduction in price; - receipts for the week have been light, but the stock in store is fully sufficient for present wants.

GRAIN-In Corn we have nothing new to report so far as GRAIN—In Corn we have nothing new to report so far as regards prices. There is a brisk demand from dealers, and a few cargoes would sell readily. In the absence of sales we quote nominally at 75 a 77½ cents \$\mathbb{P}\$ bushel,—the latter price for prime white quality. Only one cargo of 1400 bushels received by a dealer during the week, which has gone into store. —OATS—Nothing new to report. No late receipts, and supply in store pretty much worked off; in fair demand at quotations. See table. —PEAS—For Cow there continues to be an active demand, and high prices are easily obtained; only one small lot received, which has gone into store. We quote at 90 cents a \$1 \$\mathbb{P}\$ bushel, as in gone into store. We quote at 90 cents a \$1 \$\mathbb{P}\$ bushel, as in \$25 \mathbb{P}\$ bushel, \$25 \m gone into store. We quote at 90 cents a \$1 \$2 bushel, as in

only a limited demand exists from dealers. No arrivals or sales of Northern, and we quote nominally at 70 a 75 cents, as in quality. One lot of 112 bales Eastern (a prime article) was received on Friday last, and sold at \$1 per 100 lbs. LIME.—For this article there 'is merely a retail enquiry

and dealers have a full supply on hand. We continue to quote from store at \$1 10 per cask for common lump, in lots as wanted. LUMBER.-River.-No sales have been reported for the past two or three weeks, in the absence of which quotations

in table must be looked upon as merely nominal. Molasses .- In Cuba we have no change of cons to report. There has been a moderate demand throughout the week, and the market rules firm at previous prices; fair stock in first hands. We quote sales from wharf in hhds. at 23 a 25 cents per gallon, as in quantity and quality.

POTATOES .- We have nothing new to notice in this article. For Sweet there is not much demand at present, and slow of sale at 80 to 90 cent's per bushel. Irish continue to be in heavy stock, and are exceedingly difficult of sale; retailing from store at \$1 50 to \$1 75 per bbl.

PEA NUTS-Centinue to be brought in slowly, and, with moderate demand from dealers, the market has ruled steady. We quote sales of small lots during the week at & Co. prices ranging from \$1 20 to \$1 30 \$ bushel, according to quality-the latter price for a prime article.

Provisions-For N. C. cured Bacon there has been scarce ly any demand for the past week, and the market has ruled decidedly dull ;-receipts small, but we note a moderate stock remaining unsold in receivers hands. We refer to our table for prices, by the quantity. In the market for Western cured we have nothing new to report. Dealers have a fair stock on hand, and only small sales have taken place at J. & D. McRae & (prices quoted in our table. LARD-Both N. C. and Western make is in small stock, though fully adequate for Schr. J. Clark, Scott, from New York, to E. Murray & Co. the demand, which is principally from consumers. We quote at 12 a 121 cents & tb. PORK-Is in limited de-

for store rates. SALT-Market fairly supplied with all kinds, and demand light. One lot of 400 sacks Liverpool ground was received coastwise on Saturday, and sold at 74 cents # sack, cash. SHINGLES-Only small boat loads arriving, and market D. McRae & Co. tract at \$4 to \$4 50 \$9 M.

TIMBER-Has been in moderate demand for mill purposes and but little brought in ;-a prime article, sells readily at fair prices. We quote sales of several rafts during the week at prices ranging within classified figures. See table. FREIGHTS-Coastwise continue to rule decidedly dull plenty of vessels in port, and not much produce offering for shipment. We refer to our table for last prices paid, at

Flour—We lower figures this week for extra and superfine in bags—\$2 90 for the former, and \$2 75 for the latter.—

Wheat is rather dull at quotations.

Corn 75 cents # bushel, and is scarce and in demand. Cotton-The market closed last week at 11 to 111 for fair to good, middling 10 to 10½. We put our quotations at these figures, but think it likely there will be an advance this week, as the last foreign news is quite favorable. 253 bales were sold in this market last week.

Tallow is worth 10 to 11 cents # lb.; Feathers 30 and 33c. WASHINGTON, April 5th.—Naval Stores.—We have no change of importance to note. Dip Turpentine continues firm at \$3 15 a \$3 20; Tar is dull at \$1 40 a \$1 50; Spirits Turpentine 46 cents: Rosin \$1 10: Scrape Turpentine \$2 a

NEW ORLEANS, April 12 .- The sales of Cotton to-day of 16,500 bales; Middling 121 cents. The sales of the three days sum up 37,500 bales, and the receipts have been 11,000 bales, against 15,000 bales in the corresponding week of 000 bales, against 15,000 bales in the clast year. Freights to Liverpool id.

NEWBERN, April 13.—Turpentine.—Very little in market yesterday, prices fully sustained; \$3 30 for Dip and \$2 30 for Hard. Tar.—A lot of 225 bbls. was received but unse Cotton.—20 bales Cotton disposed of at 11 cents per lb. Nothing reported in other articles.

HAVANA, April 10, 1859.—Sugar (Clayed.)—The market has been rather active during the last week, although purchasers apparently operated with reluctance. The holders evinced no particularly desire to dispose of their stocks, but on the contrary seemed rather disinclined than otherwise to sell at the current rates, which were 9 to 9 reals ? arrobe for D. S. No. 12, and other qualities on that basis.—
The stock between this and Matanzas is estimated at about 235,000 boxes. Muscovados enjoyed a fair inquiry at near outports at from 7½ to 8½ reals # arrobe for inferior klefining lasses—Has declined a quarter real, and may be quote

t 32 reals for Clayed, and 42 reals for Muscovado & keg of 51 gallons. Rice—237 casks ex N. B. Borden from Charleston, realized 114 reals # arrobe.

CHARLETON, April 13.—6000. The bles of the ing amounted to 400 bales of the following prices: 60 at 101; 100 at 101; 43 at 111; 96 at 12; 15 at 111; 86 at 12]; and 43 at 122 cents.

Corn.—A cargo of 5,600 bushels No. Co., Corn arrived since our last, sold at 87 cents 30 bushel, quality mixed. Tennessee, in bags, received by railroad, sell at 90 cents 30 bushel of 56 pounds, hage included.

Rice.—The market for this article during the past week has continued unchanged, both in regard to a good demand as well as the firm rates reported in our last—the receipts of the week amounting to 3,500 tierces, were fully absorbed by the demand, at prices ranging from 31 to 41—the bulk of the sales, however, at from 32 to 32 for fair to good quality, prime and strictly prime continuing scare, and the market almost bare. Exports of the past week 3,554 tierces, including 542 tierces, the equivalent of 11,382 bushels, exported in the rough—remaining on shipboard not cleared 1,383 tierces.

Bonch Rice.—Arrivals of the week 25,000 bushels of

T HAVE A LETTER from Messrs. Grover & Baker saying

Our cotemporary of the Fayetteville Carolinian cannot understand our position on the subject of Conventions. We cannot help it. We think that our cotemporary's inability to understand us, however, furnishes no excuse for its attributing to us language we never used. It says, in its last issue: "We thought that while our cotemporary was receiving so many communications in favor of a Convention, that the Carolinian should not be slighted in such a reign of plenty!" We never said nor intimated any such thing as the Carolinian attributes to us. There is no such language in the columns of the Journal. What we did say was in the following words: "We have been frequently asked about a Convention, and have received some communications upon the subject." The Carolinian does not seem to depend much upon understanding us. Its imagination appears to supply it with all it wants. We never said we had received so many communications, nor did we ever say that they were in favor of a Con-

Our cotemporary judges rightly when it says that communications must have been written by individuals and not by the party. Communications are generally written by individuals, always we might say, without risking our reputation for bashfulness. But we presume that the "private intelligence from three Counties in the district," upon which it predicated or partly predicat- talking. The projected Road from Cheraw to the Coalfields of North Carolina demands our especial attention, as its construction must render this and the Cheraw and Darlington Road among the most profitable in the country, and prove of vast importance to the City of Charleston. Our trains now run daily from this to Cheraw; at a distance of twenty-two miles from the latter the projected Road will intersect the Wilmington and Rutherfordton Road, now being constructed, and render our market accessible to the products of the extended country through which it passes. By the completion of this and other links of Road which are contemplated—and some of the latter are actually in progress—we shall eventually be in connection with Knoxville, Tennessee. The terminus of the proposed Coalfields Road will be at some point on Deep River, where the mineral productions of of that region are found in almost in exhaustless supply. To this point, it is probable that a Road will be built from Raleigh-which will then open a new, most direct and attractive route between Charleston and New York.

They scothe pain; they protect the chest; they extract the coagulated impurities and soreness from the system: they impart strength; they are divided in sections, and yield cretions pass off, and they cannot become offensive, hence are freely worn ten times longer than any other plaster, and are cheaper at 25 cents than others at 10. Where these Plasters are, pain cannot exist. Weak persons, public speakers, delicate females, or any affected with side, chest or back pains, should try them. You will then know what they are. They are a new feature in the science of medi-

MR. I. ALEXANDER

RESPECTFULLY INFORMS the public in general, that he has a full assortment of GOLD WATCHES and fine the heat gold, and latest style and pattern of the first Manufacturers in New York. Mr. A. returns his thanks for past patronage, and announces his full determination to continue what he has undertaken, viz: To sell fine gold goods, of all descriptions, at New York wholesale prices; and to sell his goods to the citizens of Wilmington and surrounding country for what they really are. Mr. Alexander does not sell watches for \$150 which really cost only \$30; neither does he charge such exorbitant prices for other goods in his line as you have been accustomed to pay. The people say he sells the best goods for the least prices.

The public have found in Mr. A. a Jeweler who sells his goods at fair prices, and it is an established fact that two out of every three patronize him. He has introduced a remarkable change in prices, and the public are bound to acknowledge what is due to the man who has produced such wonderful changes in so short a time.

Is NOT SO LARGE and various as any in the Town of "Wilmington," or in the "United States," or even in the "World,"—neither am I selling at cost or 25 per cent the "World,"—neither am I scling at cost or 25 per cent under cost "to make room for heavy importations on ship board and daily expected." I have, however, a small assorted stock of Groceries and Provisions that are fresh and good, which I offer to my friends, and the public generally, at a small advance on prime cost. I sell to some but not to "everybody," would be glad, however, to sell to anybody, such as I have, and in quantities to suit.
